23 April 1971

MEMORANDUM FOR: Director of Training

SUBJECT : Weekly Activities Report

25X1A9a

1. [REDACTED] and I attended the Interagency Language Roundtable this week at the language school of the National Security Agency. We were interested to see that the NSA too is in the throes of an intensive look at proficiency testing, as well as a "Language Professionalization Program" that has many of the same goals as our Agency's Language Development Program. In the discussion of language development, USIA reported that it now has 95% of its 800 professional officers qualified at the S-3/R-3 level in at least one foreign language and that, since 1968, one of the prerequisites for employment at USIA is a minimal score (on the FSI scale) of 50 on the Modern Language Aptitude Test.

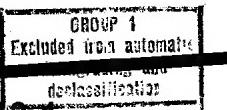

2. Because we have had so few requirements in Arabic - and have no requirements forthcoming from the components who might be expected to send us students - we are dropping Arabic from our course offerings as of 31 July. This will mean that we will be releasing one full-time and one WAE instructor.

3. This week the first step (writing of behavioral objectives) was completed on a PAI module. Responding to a need to introduce the past tense systematically at a point before the FSI French text does so, [REDACTED] are writing what will probably turn out to be two small programs, similar to the one that [REDACTED] did on the German past tense a few years ago. [REDACTED] is a newcomer to programming, but will attend the University of Michigan seminar in June.

4. The Lao Department received on loan a series of new films about the hill tribes, Lao customs, and political affairs. We are video taping them so we can show them to future classes.

5. The Basic Instructor training course is in its second week. The instructors presented sample lesson plans and classroom routines which were evaluated by several linguists on the staff. Both staff and instructors gained by the subsequent discussion on approaches, methods, and techniques used in language training.

6. [redacted] again gave the language instruction in the China Familiarization Course presented at Headquarters this week. In the eight years and 30-odd runnings of this course, the time allotted to language has been cut from half the course (about 18 hours) to  $7\frac{1}{2}$  hours, to permit expansion of the course along other lines. The cut has been made possible by reducing the language objectives. At the inception of the course, for instance, we were, at the insistence of [redacted]

25X1A8a

[redacted] teaching the students how to find a Chinese character in the telecode, a skill which almost none of the students would ever have a need for. In the present course, we teach them all they really need to know about the telecode in two periods of 50 minutes each. The rest of the language portion of the course is devoted to a description of the Chinese language family and its writing system, and an explanation of the Wade-Giles romanization system.

7. A representative of the [redacted] demonstrated its laboratory cassette recorder. The representative did an awful job of demonstrating, but [redacted] had an opportunity to examine the instrument for about an hour and reports that it is very sturdy, reliable, and easy to operate. We are considering this instrument for the Headquarters lab if we find the money is available to make the conversion.

#### 8. Language School Statistics:

Students and Classes as of the week of 12 - 16 April 1971:

##### Students

Full-time -	89
Part-time -	<u>162</u> (48 BAHLT)
TOTAL....	251

##### Classes

Full-time -	35
Part-time -	<u>54</u> ( 8 BAHLT)
TOTAL....	89

**SECRET**

Laboratory hours for the week of 12 - 16 April 1971:

Language School - 137  
Headquarters - 58

There were 27 proficiency tests given during the week of  
12 - 16 April 1971.
